

Universal Health Coverage and Primary Health Care

COURSE DESCRIPTION

The health care system in Thailand is one of the exemplary for the world. The model of health care system and its infrastructure has been the standard model for more than 40 years. This program is designed for the participants to know about the primary health care in Thailand. The health care system in Thailand also provides the Universal Health Coverage to Thai Population. The UHC coverage works under the theme of "Health for ALL" and "Health Equity" for the Thai Population. This program is best suited for those participants who are planning to work for UHC in their forthcoming days as it includes the challenges and success of implementation of UHC and Primary Health Care. To provide concept and experiences on PHC and UHC development and implementation to those who are eager to learn on the actual experience of Thailand, this training course will focus on 2 Themes: 1) Health system in Thailand and its evolution 2) Thai Universal Health Coverage: Development and Challenges
