

Instant Chicken Bouillon Cube, Sodium Reduced and Soluble Fiber Fortified Formulation

Most commercial bouillon cubes contain salt as a main ingredient, which generally more than 26-42%. They also include monosodium glutamate (MSG). Successive consumption of high-sodium diet causes hypertension. This chicken bouillon cube has been developed to reduce the sodium content by more than 27% and MSG content by 50%. In addition, there is soluble fiber addition giving 5.7 g fiber per 325 mL of clear soup obtained from a cube of this product or as 22.8% of Thai RDI. Quality scores, from the 100 tested panelists, of obtained clear soup, were good in color, texture and sensory attributes.
